

How a better phone service will improve **your** business

FOLLOW US    

**Ironton Global Cloud-Based Communication Services**  
Reliable, Simple & Affordable

# Affordable and Reliable

Ironton Global's cloud-based phone systems use the power of the Internet to deliver your phone service, eliminating the complexity and expense that comes with traditional phone systems.

## Talk to your employees anywhere

Wherever your employees are, Ironton Global's cloud-based phone service connects everyone together under one phone system. Whether your employees are in the office or work remotely everyone is only an extension away.

## Affordable pricing

There is no benefit in owning technology. Your business benefits from using technology. With that in mind we provide our clients with multiple affordable options to best work with you and your monthly budgets. If you don't see a price package that speaks to you we will work with you to best set one up.

## Never worry about lines going down again, or hardware updates

Talk about how our phone systems are cloud based. How a call can never get dropped because the signal just re routes through another server so you will never have a dropped or missed call again.

## Cloud based phone systems

Our cloud-based phone systems use the Internet to deliver all the features of an on-premise PBX except the expensive setup and the bulky hardware. Being the Internet isn't bound to a specific location, cloud-based PBX integrates multiple locations and remote employees together.

## Use any device

With our cloud based phone systems, you can use any device to communicate such as iOS or Android based Mobile Phones or Tablets. There are just so many options, as well as desktop phones and video phones.

## Use it anywhere

Another benefit of our cloud is that it hovers over you just about everywhere. Whether working remotely in the big city or sitting on your porch in the country side, you will always stay connected, as if you are in your office. Transfer to internal extensions, check your voice mail and much more.

# THE WORLD IS **YOUR** OFFICE

## Find me Follow me Feature

With Ironton Global's Find Me Follow Me feature, you can work from anywhere. Wherever you are, your calls will be forwarded where you are. With Ironton Global's Find Me Follow Me feature, traveling and working has never been easier.

# Using hosted PBX Phone Systems

Wherever your employees are Ironton Global's cloud-based phone service connects everyone together under one phone system. Whether your employees are, in the office or work remotely, everyone is only an extension away.
